

## LABRADOR CITY

*March 20<sup>th</sup>, 2020*

Facilities Update - After careful consideration of information from the Chief Medical Officer of NL and various other sources, we recognize that the need to get outdoors and stay active during these unprecedented times - while practicing social distancing - is important.

Accordingly, we are pleased to advise that a decision to re-open the Dog Park and Tanya Lake Walking Trail has been made. We ask all residents using the Tanya Lake Trail to do so by following a One-Way Directional System - leave from the old Scout Lodge location, walking up around the lake over to the highway side and back across the beach. This will help eliminate close face to face contact.

We would like to remind everyone that while we are reopening these locations, social distancing must be maintained, and personal hygiene remain top priority! While out if you sneeze or cough, please do so into a tissue or arm as necessary, wash hands before and after your outing, and refrain from touching your eyes, nose, mouth.
