

LABRADORWEST

## Removal of Highway Checkpoints

FOR IMMEDIATE RELEASE

05/15/2020

**Labrador City & Wabush, NL, May 15, 2020** – Please be advised that the Highway Checkpoint at the weigh scales on the Trans Labrador Highway has been removed. The checkpoint was initially set up for information purposes and to track how many non-residents were coming & going within our communities.

With the province moving to Alert Level 4, and after careful review of those travelling in & out over the past month, which consisted of mostly cabin goers and transportation of goods, we are comfortable with removing the Checkpoint at this time. We will continue to monitor the provincial case numbers and alert levels and reinstate the checkpoint if necessary.

We would like to take this opportunity to thank you, our residents, for your ongoing efforts in keeping our communities safe; it has not been an easy task, but one we are winning. Let's keep it up!
